

Steps to protect
your UI account
and lower your
vulnerability to
cyber fraud

PROTECT YOUR UNEMPLOYMENT INSURANCE (UI) ACCOUNT FROM CYBER FRAUD

Create a Strong Password

Include a combination of upper and lowercase letters, numbers, and special characters. Avoid reusing passwords, easy to guess words such as, family member names, pet names, and birthdates. Consider using a password manager tool to securely create and store your passwords. Never write down your passwords.

Review your UI Claim Often

Make sure your password, direct deposit banking information, and address have not been changed.

Beware of Fraud Schemes

Fraudsters try to steal your personal information by directing you to click on a link in an email or text message which often contain threats that your UI benefits will be affected or terminated if you do not respond. If you receive such a message, immediately contact the UI agency, and check the website for alerts on scams affecting UI claimants.

Enable Multi-Factor Authentication (MFA)

If offered, enable MFA to help protect your UI account. MFA adds a second layer of security by requiring a one-time code from a secondary device, such as your cell phone, to complete the login process.

Use Secure Internet Connections

If you need to use public Wi-Fi to access your UI account, go to a secure site such as a public library or a state agency workforce office. If using Wi-Fi from other public locations, use a Virtual Private Network. Always make sure no one can see your login credentials.

Keep Device Software Updated

Ensure your computer, smartphone, and other electronic devices are updated and be sure to add anti-virus and anti-malware software for monitoring.

**REPORT ANY SUSPICIOUS
ACTIVITY ON YOUR ACCOUNT
IMMEDIATELY TO THE UI AGENCY!**
